sam@samsa.me

I am a senior engineer with wide ranging technical and managerial skills who enjoys working in fast-paced environments on innovative engineering problems.

## Experience

JUNE 2023 - AUGUST 2025

### **Planetary Processing Limited, Remote** - *Managing Director*

- Founder of a fully funded startup developing technology for the gaming industry.
- Acting as both CEO and CTO roles, leading development within a small engineering team while also handling people management and other business operations.

DECEMBER 2021 - JUNE 2023

### **Bud Financial Limited, London** - *Backend Engineer*

- Developing backend microservices in Golang.
- Identified process issues early on and have taken lead on driving toil reduction and engineering optimisation to streamline development.

SEPTEMBER 2020 - DECEMBER 2021

### **Lake Parime Limited, Location** - *Software Developer*

- Developing infrastructure to manage remote data centres, in pure Golang.
- Took on team leadership role within software development department.
- Worked to create structure in early startup environment such as standardising software development pipeline and new starter induction.

## Education

SEPTEMBER 2017 - JUNE 2020

### **University of Cambridge** - *BA (Hons) Computer Science*

Class: 1st. Including modules on networking, distributed systems, communications and digital signal processing, and a final year project creating a peer-to-peer online world.

## Skills

**Programming:** Golang, Java, Python, SML, C/C++, C#, Lua, JavaScript, SQL, Prolog, VB.NET.

**Other technologies:** Linux, Git, CI/CD, microservices, gRPC, Prometheus, Grafana, Electronics, containers, GCP, AWS.

**Languages:** English (C2), French (B2) and German (A2).
